Dear client:

To ensure the completeness and accuracy of your evaluation, it is necessary that we gather as much relevant information as possible. To assist us in this task please complete the attached questionnaire, client rights and responsibilities and the separate Driver Risk Inventory answer sheet, as completely and honestly as possible. Failure to completely answer all of the questions will result in your not being accepted for enrollment in the DUI Program. You may be contacted to return to re-take the Driver Risk Inventory Questionnaire if the results indicate an "invalid test" for one of several reasons: reading impairment; emotional stress; trying too hard; or guessing, when there are no "good" or "bad" answers; or, providing false information.

The DUI Program will not discuss your file or attendance with parents, spouses, children or attorneys. **You** must ask questions <u>in person</u>. No specific information can be given out by telephone.

Thank you for your cooperation,

Bridgeway Center, Inc. DUI Program

(HIV/AIDS affects the body's ability to fight off infections. Because alcoholics and addicts may be involved in casual sex or share needles, they are more likely to have HIV/AIDS. Recent weight loss, tired easily, short of breath, body aches or having sores are all symptoms of HIV/AIDS. If you are shooting drugs, you should stop immediately and complete treatment. We can evaluate you and if you have a contagious disease, and if you want us to, we will help you find counseling or treatment for that disease. We will not discriminate against you or refuse you treatment because of any contagious disease.)
